Работа на платформе. Модуль «Комплекс работ». Раздел «Все открытые»

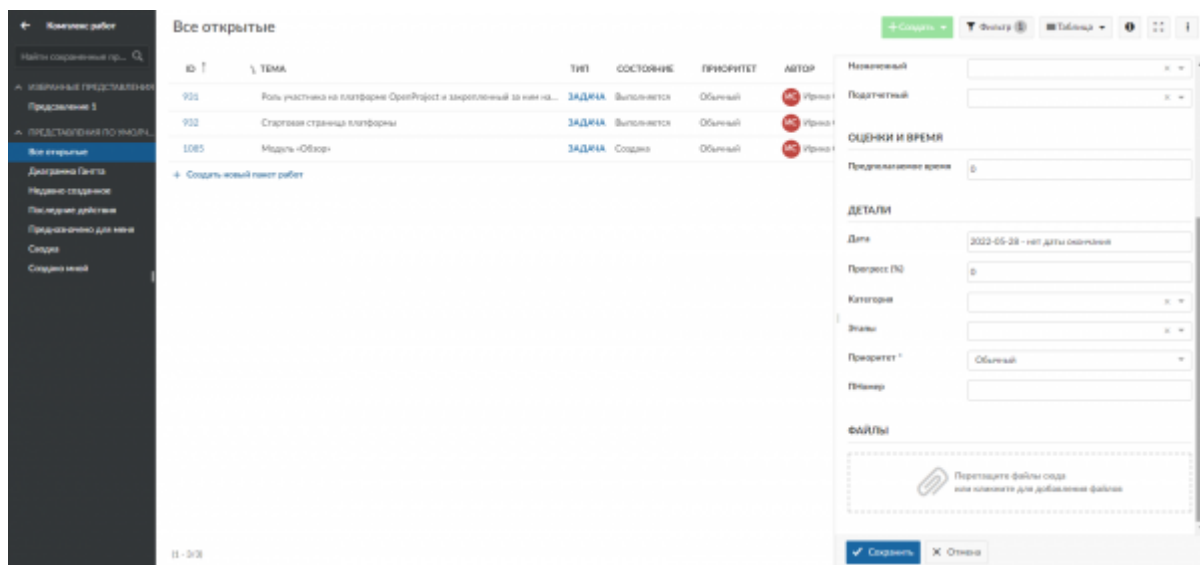

Как создать дочерний пакет работ

В пакетах работ можно создать **иерархию**, то есть разбить «большой» пакет работ на несколько «более мелких».

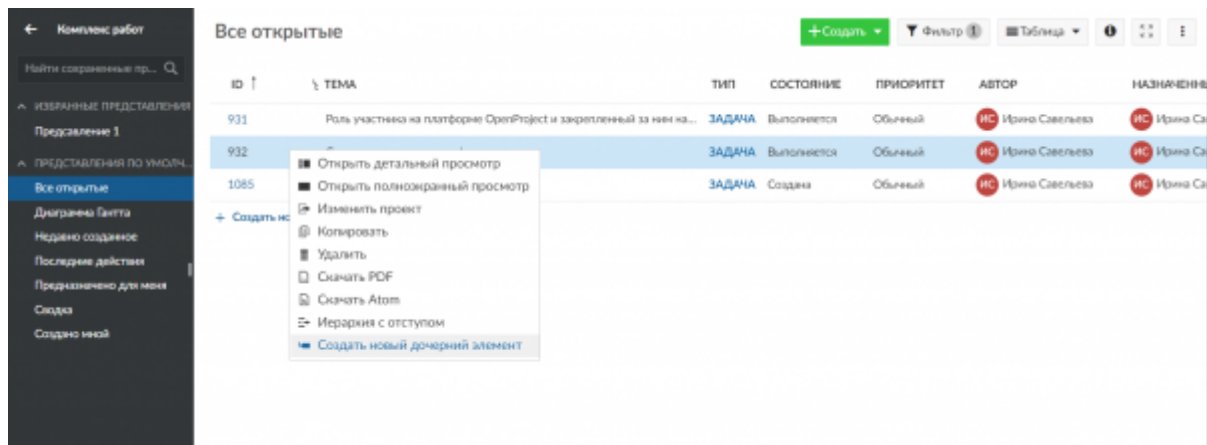

Существует **три способа добавления или создания дочернего элемента**:

1) добавление или создание **дочернего элемента** на вкладке **СВЯЗИ** в представлении сведений о пакете работ;

2) щелкнув правой кнопкой мыши на пакет работ в списке пакетов работ и выбрав в открывшемся меню опцию **Создать новый дочерний элемент**;

3) щелкнув правой кнопкой мыши на пакет работ в списке пакетов работ и выбрав в открывшемся меню опцию **Иерархия с отступом**.

Изменение родительского пакета работ

Чтобы **отредактировать** или **удалить родительский пакет** «Пакета работ», откройте его. В верхней части представления сведений о «Пакете работ» отображается иерархия. Нажмите на значок **изменить** или **удалить**, чтобы изменить родителя пакета работ.

Редактирование пакетов работ

Чтобы **отредактировать «Пакет работ»**, дважды щелкните строку пакета работ в представлении списка или откройте разделенный экран, чтобы просмотреть подробные сведения. В разделе Сведения о пакете работ вы можете щелкнуть в любом поле, чтобы обновить его, например, изменить описание, состояние, приоритет, назначенный или добавить комментарий. Чтобы сохранить изменения в описании, щелкните значок галочки. Другие поля ввода можно сохранить с помощью Enter. Зеленое сообщение в верхней части рабочего пакета указывает на успешное обновление.

Все изменения рабочего пакета документируются в операции **«Деятельность»**.
